

Wildland Fire Management Information (WFMI) Weather - Lesson 2: Logon

Once logged in to WFMI

After completing the logon to WFMI and viewing Terms of Service/message pages, a Logon: Success page is displayed. This page shows account information and the modules the user may access.

WFMI - Logon: Success

You have successfully logged on to the Bureau of Land Management (BLM) Wildland Fire Management Information (WFMI) web-site.

Account Information

Username: SBEAR

Name: Smokey Bear

Title:

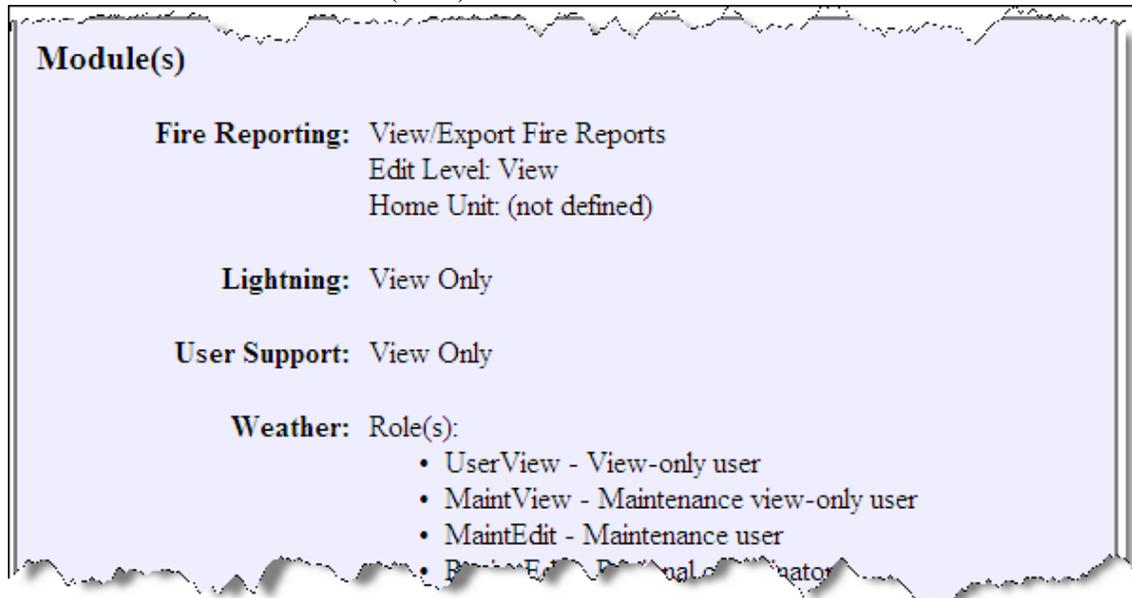

Phone number: (800)832-1355

Email address: smokeybear@fs.fed.us

Organization: United States Forest Service
Regional

Check the account information for completeness. This information can be corrected or updated within WFMI by selecting User Preferences link.

Look at the Module(s) list. This shows which WFMI modules the user is authorized to access and the level of access (Role).

Module(s)

Fire Reporting: View/Export Fire Reports
Edit Level: View
Home Unit: (not defined)

Lightning: View Only

User Support: View Only

Weather: Role(s):

- UserView - View-only user
- MaintView - Maintenance view-only user
- MaintEdit - Maintenance user
- Personal of Navigator

For ordering sensors and completing post-trip documentation, the user must have the MaintEdit role for the Weather module.
